

Ragini Sharma

Product Manager | 0→1 Products | SaaS, Marketplace & AI Products | Product Strategy, Growth

Gurgaon/Gurugram, Haryana | +91 95716 75572 | raginisharma.official@gmail.com

<https://www.linkedin.com/in/raginisharmaofficial/>

Professional Summary

Product Manager with 6+ years of experience building and scaling 0→1 SaaS, marketplace, AI-enabled, and digital transformation products across startup ecosystems. Progressed from Project Management into Product Management, developing expertise in product strategy, roadmap planning, user research, growth optimization, monetization, stakeholder management, and Agile execution across mobility, ecommerce, subscription, and workflow automation platforms.

Led end-to-end product initiatives, including product discovery, PRDs, sprint planning, onboarding optimization, retention, and GTM execution. Improved MVP planning efficiency by ~40% for 50+ founders through structured roadmap frameworks and data-driven product decisions focused on scalability, engagement, and operational efficiency.

Professional Experience

The New Angle (Jaipur, Rajasthan, India)

Product Manager

Mar 2021 – Present

May 2024 – Present (Remote)

- Reduced MVP planning and execution time by ~40% for 50+ founders through roadmap frameworks, prioritization systems, and structured PRDs.
- Led product lifecycle across marketplace, SaaS, and workflow automation products, including product discovery, sprint planning, GTM execution, and release management.
- Improved onboarding and activation conversion by ~35% across multiple products through funnel optimization and workflow redesign.
- Drove monetization, engagement, and retention initiatives using user behavior analysis and operational insights.
- Managed cross-functional teams across engineering, design, operations, and business stakeholders, improving execution predictability and delivery efficiency.
- **Key Products Delivered:**
 - **HiRide – Carpooling / Mobility Marketplace**
 - Improved successful ride booking completion rate by ~28% through rider-driver matching and trip lifecycle optimization.
 - Increased onboarding conversion by ~35% by redesigning authentication and activation workflows.
 - Implemented subscription-based monetization model, increasing repeat engagement by ~22% while improving marketplace liquidity through matching and engagement optimizations.
 - **Damroo – Music Streaming Platform**
 - Led migration from Ionic to React Native and backend transition from PHP to Node.js, improving scalability and streaming reliability.
 - Reduced app load and streaming lag issues, improving DAU, MAU, onboarding completion, and average listening duration.
 - Improved retention and creator adoption through onboarding, discovery, engagement, and artist distribution workflow optimization.
 - **TheBabyBo – Multi-Vendor Ecommerce Marketplace**
 - Increased seller activation rate by ~40% through vendor onboarding and product listing optimization.
 - Improved customer purchase conversion by ~22% through browse-to-checkout journey redesign and operational workflow improvements.
 - Restored platform operations within ~3 hours during the Dubai infrastructure disruption (Due to the Iran war) by shifting traffic to Indian servers.
 - **Fixpapa – IT Hardware Service Platform**
 - Reduced service resolution time by ~35% through centralized ticketing workflows and operational automation.
 - Improved service completion efficiency by ~30% through lifecycle tracking systems and

- role-based operational workflows.
- Built end-to-end service management workflows covering assignment, tracking, inventory coordination, and service resolution.

Associate Product Manager

June 2023 – May 2024

- Converted ambiguous founder requirements into execution-ready MVPs, scalable product flows, PRDs, and user stories.
- Led feature prioritization, sprint planning, backlog management, and release coordination across ecommerce, SaaS, and marketplace products.
- Conducted user research, workflow analysis, and product discovery to identify high-impact retention and engagement opportunities.
- Collaborated with engineering and business teams to align feature execution with monetization and user acquisition goals.

Project Manager

Mar 2021 – June 2023

- Managed end-to-end product delivery workflows, improving execution consistency across concurrent client projects.
- Built agile coordination systems, reducing operational bottlenecks and improving cross-functional execution efficiency.
- Coordinated stakeholders across business, engineering, and operations teams to ensure timely feature delivery and execution alignment.

Project Manager: Marketing & Communications

Everdata Technologies (Jaipur, Rajasthan, India)

Dec 2020 – Mar 2021

- Increased customer acquisition by ~35% through campaign optimization and structured execution planning.
- Introduced reporting and operational tracking systems, improving stakeholder visibility and campaign performance.
